The THERMAFLOW Model SS600 combines the efficiency of an all aluminum heat exchanger with the strength and good looks of stainless steel. The SS600 also incorporates an optional directional control valve kit for changing the direction of the drive motor or for selecting between pump drives. The Model 600 will drive most 3" and 4" product pumps and compressors, with options for multi-pump applications.

STAC Inc...Designing hydraulic systems for your needs!

At STAC, we've been designing hydraulic systems for over 25 years. it's all we do! We'll design a hydraulic drive to fit your application. Besides the Model 600, we offer a number of other models that can fit any horsepower applications or custom design a cooling system for your needs.

Food Grade - Chemical - Compressed Gas - Crude Oil - Vacuum Pumps - Combo Drives

SPECIFICATIONS

Flow Rate: 30 GPM
Max Pressure: 3000 PSI
Reservoir: 3.5 Gallons
Weight (Dry): 79 LBS
Warranty: 2 Years
 1 1/2" NPTM Suction
Porting: #12 MJIC Pressure
 #12 MJIC Return
Dimensions: 20" (L) X 20" (W) X 20" (H)
